# **Kodiak Management Area Herring Sac Roe Fishery Harvest Strategy for the 2019 Season**

by

**Geoff Spalinger** 

**March 2019** 

Alaska Department of Fish and Game

**Divisions of Sport Fish and Commercial Fisheries** 

#### **Symbols and Abbreviations**

The following symbols and abbreviations, and others approved for the Système International d'Unités (SI), are used without definition in the following reports by the Divisions of Sport Fish and of Commercial Fisheries: Fishery Manuscripts, Fishery Data Series Reports, Fishery Management Reports, and Special Publications. All others, including deviations from definitions listed below, are noted in the text at first mention, as well as in the titles or footnotes of tables, and in figure or figure captions.

# REGIONAL INFORMATION REPORT 4K1905

# KODIAK MANAGEMENT AREA HERRING SAC ROE FISHERY HARVEST STRATEGY FOR THE 2019 SEASON

by Geoff Spalinger Alaska Department of Fish and Game, Division of Commercial Fisheries, Kodiak

> Alaska Department of Fish and Game Division of Sport Fish, Research and Technical Services 333 Raspberry Road, Anchorage, Alaska 99518-1565

> > March 2019

The Regional Information Report Series was established in 1987 and was redefined in 2007 to meet the Division of Commercial Fisheries regional need for publishing and archiving information such as area management plans, budgetary information, staff comments and opinions to Alaska Board of Fisheries proposals, interim or preliminary data and grant agency reports, special meeting or minor workshop results and other regional information not generally reported elsewhere. Reports in this series may contain raw data and preliminary results. Reports in this series receive varying degrees of regional, biometric and editorial review; information in this series may be subsequently finalized and published in a different department reporting series or in the formal literature. Please contact the author or the Division of Commercial Fisheries if in doubt of the level of review or preliminary nature of the data reported. Regional Information Reports are available through the Alaska State Library and on the Internet at: http://www.adfg.alaska.gov/sf/publications/.

| 1.     | Map of the Kodiak herring sac roe fishery harvest areas  |

#### **ABSTRACT**

This report describes the harvest strategy for the 2019 Kodiak Management Area (KMA) commercial Pacific herring *Clupea pallasii* sac roe fishery and includes the 2019 guideline harvest levels (GHL) by section, management changes from previous years, and reporting and registration requirements. The 2019 KMA areawide GHL is 1,405 tons, and individual GHLs have been established for 34 sections. The areawide GHL is divided between purse seine gear and gillnet gear due to a regulatory allocative management plan (5 AAC 27.535(e)). The purse seine GHL is 1,050 tons (74.7% of the areawide GHL), and the gillnet GHL is 355 tons (25.3% of the areawide GHL).

There will be 2 types of fishing periods in the KMA: those that fall under the "standard" fishing schedule established in regulation (5 AAC 27.510), and those that occur in sections managed by emergency order (EO). In order to maximize roe quality and control harvest rates, fishing periods for the Village Islands/Uganik Bay and Danger Bay sections will be established by EO. Herring will be sampled for age, sex, weight, length, and maturity from purse seine test sets. Time and area restrictions may be used to target effort on large herring with the highest roe content.

Key words: sac roe, herring, *Clupea pallasii*, guideline harvest levels, GHL, Kodiak Management Area, KMA, harvest strategy, Fisheries Management Report, FMR

#### INTRODUCTION

The Alaska Department of Fish and Game (ADF&G) Commercial Fisheries Division staff in Kodiak will manage the 2019 Kodiak commercial Pacific herring *Clupea pallasii* sac roe fishery. This report presents the harvest strategy for the Kodiak Management Area (KMA) herring sac roe fishery, including the guideline harvest levels (GHL) by section, section gear assignments, changes in management, and reporting and registration requirements for the 2019 fishery.

The Kodiak herring sac roe fishery begins April 15 and lasts until June 30 (5 AAC 27.510 (a)). The fishery is intended to occur in an orderly fashion, with minimal waste of resource and within conservation limits as determined by ADF&G, while striving for the highest quality product (5 AAC 27.535(e)(6)). The fishery will be managed in accordance with general statewide herring guideline harvest policies, which provide for catches in traditional inshore areas, management for the greatest value, and exploitation (harvest) not to exceed 20% of the available spawning biomass. Conservative GHLs are established due to the uncertainty in estimating individual section populations.

The KMA is divided into 13 districts that define areas used to manage the herring sac roe fishery (Figure 1; Table 1). Each district is further divided into smaller areas called sections. There are 81 sections in the KMA that define spawning areas or historical harvest locations. Current statistical charts, which illustrate districts and sections, are available at the ADF&G office in Kodiak (Figure 1).

GHLs are preseason harvest projections that are established for individual sections by Kodiak ADF&G fishery management biologists (Table 1). After a review of stock status trends for the entire KMA, ADF&G determines which sections will be open to commercial fishing and what level of harvest will be targeted. Each section's GHL is based on the following: 1) fishery performance during the preceding season or seasons (using total harvest, timing, duration of fishery, or average school size); 2) trends in age composition; 3) spawn and juvenile herring observations; 4) aerial surveys; and 5) hydroacoustic surveys. Information from commercial fishermen and spotter pilots are also considered in setting a GHL.

# 2019 HARVEST STRATEGY

#### GUIDELINE HARVEST LEVELS

For the 2019 season, GHLs have been established for 34 of 81 sections (Table 1). Thirteen sections had little or no harvest during the last 10 years and are designated as exploratory in 2019. Exploratory areas are open to both gear types and have no set GHL. The remaining sections will remain closed, based on either low abundance or lack of herring sac roe harvests.

The 2019 areawide GHL of 1,405 tons (Table 1) is an increase of 220 tons from the 2018 GHL of 1,185 tons (Table 2).

#### HARVEST ALLOCATION

ADF&G shall manage the herring sac roe fishery to provide opportunities for gillnet permit holders to harvest approximately 25% of the total preseason GHL and purse seine permit holders to harvest approximately 75% (Table 1; 5 AAC 27.535(e)). With few exceptions, this is accomplished by assigning sections to only purse seine gear or only gillnet gear. Each district having more than 1 section that is open for fishing will have approximately 20–30% of the GHL for the district allocated to the gillnet permit holders and 70–80% allocated to the purse seine permit holders (5 AAC 27.535(e)(2)(D)). Determining which gear type will be assigned to a section is based on the following: 1) estimated biomass and age composition of the stock(s) within a section; 2) historical harvest by gear from that section; 3) historical harvest timing; 4) management concerns; 5) determination of allocative percentages; and 6) input from fishery participants as solicited during a preseason meeting.

From May 1 through June 30, ADF&G may open any area with remaining GHL to any gear group if the fishery is not likely to result in overharvest (5 AAC 27.535(e)(1)(C)).

Of the total 1,405 ton GHL, 1,050 tons of herring (74.7%) will be allocated to purse seine permit holders, and 355 tons (25.3%) will be allocated to gillnet permit holders (Table 1) in accordance with regulatory management plan (5 AAC 27.535(e)).

# **SECTION ASSIGNMENTS**

The following adjacent sections will be combined and managed as a single section for the 2019 sac roe herring season ((5 AAC 27.535(e)(1)(A)); Table 1):

- Izhut Bay, Kitoi Bay, and MacDonald Lagoon;
- Village Islands, Northeast Arm Uganik, East Arm Uganik, and South Arm Uganik bays;
- Outer Kiliuda and Inner Kiliuda bays; and,
- Outer Deadman and Inner Deadman bays.

The remaining sections will be assigned as follows:

| Purse Seine <sup>a</sup>    | Gillnet <sup>a</sup> | Exploratory (both gear types) |  |  |
|-----------------------------|----------------------|-------------------------------|--|--|
| Village Islands/Uganik Bays | Perenosa Bay         | Delphin Bay                   |  |  |
| Inner Alitak                | Tonki Bay            | Bluefox Bay                   |  |  |
| Inner/Outer Deadman         | Malina Bay           | Geese-Twoheaded               |  |  |
| E. Upper Olga Bay           | Raspberry Strait     | Kaiugnak                      |  |  |
| W. Upper Olga Bay           | Viekoda Bay          | SW Sitkalidak                 |  |  |
| Three Saints Bay            | Terror Bay           | Newman Bay                    |  |  |
| West Sitkalidak Strait      | West Uganik Passage  | Tanginak Anchorage            |  |  |
| Inner/Outer Kiliuda Bay     | Sulua Bay            | Inner Kukak Bay               |  |  |
| East Sitkalidak Strait      | Lower Olga Bay       | Inner Katmai Bay              |  |  |
| Outer Ugak Bay              | Shearwater Bay       | Alinchak Bay                  |  |  |
| Danger Bay                  | Barling Bay          | Puale Bay                     |  |  |
| Izhut/Kitoi/MacDonald       | Inner Ugak Bay       | Portage Bay                   |  |  |
| Kizhuyak                    | Womens Bay           | Wide Bay                      |  |  |
|                             | Kalsin Bay           |                               |  |  |

<sup>&</sup>lt;sup>a</sup> Beginning May 1, sections may be opened to either gear type.

#### FISHING PERIODS

# **Daily Fishing Periods for Most Purse Seine and Gillnet Sections**

Unless otherwise specified by emergency order (EO), herring may be taken during the sac roe season from April 15 through June 30 as follows:

- For purse seine permit holders: from April 15 through May 7, fishing periods are from noon until 9:00 p.m. on odd-numbered days and from 9:00 a.m. until noon on even-numbered days. From May 8 through June 30, fishing periods are from noon until 10:00 p.m. on odd-numbered days and from 9:00 a.m. until noon on even-numbered days (5 AAC 27.510(a)(1)).
- For gillnet permit holders: normal fishing periods are from noon on odd-numbered days until noon on even-numbered days (5 AAC 27.510(a)(2)). However, continuous fishing will be announced by EO due to minimal participation and low overharvest concerns.

Regulations stipulate a 24-hour closed period for both gear types from noon on even-numbered days until noon on odd-numbered days (5 AAC 27.510). The day-on, day-off schedule applies to most sections allocated to seine gear, except for those to be managed under EO authority.

It is anticipated that gillnet effort will be low in 2019. As a result, fishing periods in gillnet-only sections will be announced by EO and remain open until further notice. If effort is higher than anticipated, fishing periods in gillnet-only sections will revert to the schedule in regulation

ADF&G may use EO authority to restrict fishing time and close areas in any section if overharvest concerns exist during the season. ADF&G may also use EO authority to close sections if resources are not available to monitor the fishery and there are overharvest concerns.

#### PURSE SEINE FISHERY MANAGEMENT

ADF&G will manage the Outer Ugak Bay, Village Islands/Uganik Bay, and Danger Bay sections differently than other purse seine sections within the KMA. Openings of these sections may be delayed, and some of these sections will be managed inseason by EO to maximize roe percentage of the landed product and to control harvest rates.

# **Outer Ugak Bay Section**

The initial opening in the Outer Ugak Bay Section will be delayed until an ADF&G vessel is available to monitor the fishery. A news release will be issued 24 hours in advance of any opening in this section. Once open, fishing periods will follow the normal fishing schedule stated in 5 AAC 27.510(a)(1). Fishermen are strongly encouraged to sample catches for roe quality and size of herring prior to landing to ensure the highest value of product.

# Village Islands/Uganik Bay sections

The Village Islands, Northeast Arm Uganik, East Arm Uganik, and South Arm Uganik sections will be managed as one section with a total GHL of 150 tons (Table 1). The Village Islands/Uganik Bay sections will be open to purse seine only in 2019.

These sections will be actively managed for roe quality and size of herring by the ADF&G management biologist aboard the R/V *K-Hi-C*. There will be at least 24-hour notice prior to any potential fishing period. ADF&G will attempt to target herring with approximately 11% roe recovery on the grounds. Permit holders wishing to fish in these sections are urged to contact the management biologist to volunteer for test fishing and discuss how the fishery will be managed.

# **Danger Bay Section**

The Danger Bay Section will be managed with a total GHL of 150 tons (Table 1). The Danger Bay Section will be open to purse seine only in 2019.

This section will be actively managed for roe quality and size of herring by an ADF&G management biologist aboard either the ADF&G vessel R/V *K-Hi-C* or R/V *Resolution*. ADF&G will attempt to target herring with approximately 11% roe recovery on the grounds. Permit holders wishing to fish in this section are urged to contact the management biologist at 10:00 a.m., Monday, April 15, aboard the R/V *K-Hi-C* or R/V *Resolution* to volunteer for test fishing and discuss how the fishery will be managed.

#### GILLNET FISHERY MANAGEMENT

Gillnet fishing periods will be modified by EO to allow continuous fishing.

# **TEST FISHING**

ADF&G staff will not conduct roe recovery testing; industry personnel (processor technicians, fishermen, or tendermen) are expected to determine roe quality. Instructions on how to determine roe quality and recovery percentages may be available from buyers and processors. Additionally, processors establish minimum size requirements (average weights) for the herring that they will purchase. All fishermen are urged to check with their buyer to determine what roe recovery and size limits will be marketable.

Prior to any fishing period in the Village Islands/Uganik Bay and Danger Bay sections, the management biologist on the grounds will seek volunteer fishermen to conduct test sets to sample fish size and roe quality. The management biologist will choose the boats to make test fishing sets. In some circumstances, more than 1 boat may be needed. All test fishing will be coordinated and directed by the ADF&G management biologist on the grounds. No test set will be allowed without first consulting the management biologist, either in person or via VHF radio channel 6.

Small amounts of herring from each test set will be kept to determine marketability. Approximately 75–150 lb of herring will be randomly selected from each set to be tested for mature roe and average weight (grams). Herring will be sampled onboard the fishing vessel or may be transported to a central fishing boat or tender for later testing. ADF&G biologists will attempt to manage fisheries so that industry roe recovery and size requirements are met or exceeded. ADF&G will broadcast test fishery results on VHF channel 6.

# MANAGEMENT FROM MAY 1 TO JUNE 30

ADF&G may open any section with unharvested GHL to both gear groups beginning May 1 unless overharvest concerns exist (5 AAC 27.535(e)(1)(c). Some areas will not open to both gear groups until an ADF&G field crew is stationed on the grounds to monitor the fishery. At least 24 hours of advance notice will be given prior to opening an area to both groups.

# ADF&G AND INDUSTRY COOPERATION

There will be a preseason registration requirement that will require permit holders to report harvest location and tonnage immediately after landing herring. Fishermen should immediately contact the area management biologists in Kodiak, or onboard the R/V *K-Hi-C* or the R/V *Resolution*, when a harvest occurs. Timely harvest reporting is essential to managing the Kodiak herring fishery. ADF&G staff will make frequent contact with permit holders to collect harvest data, fleet movement information, spawn observations, and observations of juvenile and adult herring concentrations.

Past cooperation between the ADF&G, the fishing fleet, and buyers has been excellent, and it is hoped that this will continue. If cooperation is lacking, **closure of sections may be necessary**, and future openings will be closely evaluated. Fishermen are strongly encouraged to sample catches prior to landing in order to harvest the highest value product possible.

Permit holders and spotter pilots are encouraged to provide biomass estimates, juvenile herring observations, and spawn observations to management staff. Past cooperation has helped staff evaluate stock status and gain critical management information. All information from fishermen and spotter pilots will remain confidential. Of particular interest are any observations of herring in closed management sections. Timely information will be used by management staff to conduct aerial or hydroacoustic surveys to assess herring abundance.

Samples from commercial herring harvests will be collected by management biologists. These are primarily used to monitor age composition, and when used with other stock performance indicators, to assist in determining stock status. Support and assistance from the industry is necessary for this style of fishery management to be successful. This support will result in a more manageable fishery and greater economic benefit to the permit holders, and will help ensure the long-term health of the KMA herring stocks.

# CATCH REPORTING FOR BUYERS AND TENDERS

Processors and independent tender operators are required to provide daily catch reports by section to the Kodiak ADF&G office by 9:00 a.m. Herring onboard tenders that have not yet been delivered to a processing facility must also be reported. Timely and accurate harvest reports received from field crews, permit holders, tender operators, spotters, and processors are critical in the assessment of herring harvests and guide the management of the fishery. Late or inaccurate information could result in premature area closures or overharvest. Catch reporting procedures and ADF&G contact information is listed on the registration permit.

#### PRESEASON PERMIT HOLDER REGISTRATION

ADF&G will require permit holders to register prior to participating in the 2019 fishery. It is the responsibility of the permit holders to keep ADF&G informed of fishing activity and report herring harvests daily. The registration permit will outline reporting requirements by gear type. Failure to maintain contact with ADF&G will result in closures.

Purse seine permit holders are reminded that they may use only 1 purse seine vessel to harvest herring; this may be either the vessel identified on the permit card or a replacement vessel. If a Kodiak sac roe seine permit holder intends to fish with a different vessel than is listed on their permit card, they must register the replacement vessel with Kodiak management staff (5 AAC 27.525(d)).

#### **REGISTRATION PERMIT**

Each KMA tender operator and buyer must obtain a registration permit from ADF&G in the Kodiak office, either in person or through an authorized agent (5 AAC 27.540). A registration permit is required prior to taking fish onboard the tender or taking fish at the processing plant. Tenders are required to complete ADF&G fish tickets for each delivery. The fish ticket must have the fisherman's permit information legibly recorded and must show how many pounds or tons of fish were harvested (the on-the-grounds weight), date of harvest, and section from which the fish were harvested.

#### TRANSPORTER PERMITS

All KMA herring sac roe permit holders that intend to transport herring, other than their own commercially harvested herring, are required to have in their possession a fish transporter permit (AS 16.05.671). Permit applications are available at the Kodiak ADF&G office.

# EMERGENCY ORDER ANNOUNCEMENTS

Two types of EOs will be issued inseason: 1) announcements of short commercial fishing periods or closures in the Village Islands/Uganik Bay and Danger Bay sections; and 2) announcements of inperiod fishery closures in sections that follow the standard fishing schedule. When a preseason GHL for a section is approached or achieved, that section will be closed for the remainder of the season. Due to the rapid pace of the harvest in certain locations, inperiod closures are likely. When inperiod closures are necessary, there may be as little as 5 minutes advance notice prior to the closure time, or less if appropriate. Inperiod closures will be announced on VHF channel 6. Fishermen and tender operators should monitor VHF channel 6 to remain aware of section closures.

At any time during the season, if ADF&G determines that herring stock abundance is below preseason expectations, sections may be closed prior to reaching their GHL.

A news release will be issued to announce fishery decisions such as openings, closures, and area restrictions. News releases are posted on the ADF&G website and distributed to processors, local radio stations, newspapers, and other interested parties.

All permit holders, tender operators, and processors are responsible for staying updated on section closures as they occur inseason. Fishery information can be obtained in the following ways:

- 1) Contact the herring management staff in the Kodiak office in person, by telephone at 486-1830, or by using Dispatch #7410.
- 2) Contact ADF&G field personnel on VHF channel 6 or using Dispatch (R/V *K-Hi-C*: #7412, RV *Resolution* #7411).
- 3) Contact any local herring processor for the latest Kodiak herring news release.
- 4) Call the ADF&G message phone at 486-4559.
- 5) Obtain a copy of the most recent news release from the Kodiak ADF&G office at 351 Research Ct. (copies are available 24 hours a day in a bin located outside the main entrance to the building).
- 6) News releases may also be searched for and subscribed to on the internet at <a href="http://www.adfg.alaska.gov/index.cfm?adfg=cfnews.main">http://www.adfg.alaska.gov/index.cfm?adfg=cfnews.main</a>.
- 7) Contact ADF&G biologists after hours at the following numbers:

James Jackson – 907-942-2097 Todd Anderson – 701-214-7667 Geoff Spalinger – 952-567-1420

# HERRING TEST FISHERY PROGRAM

A herring test fishery program is proposed for the 2019 season to generate funds to be used for Kodiak herring fishery management and research projects. However, if herring prices are low and the test fishery would impact processor capacity, then the test fishery could be cancelled. ADF&G is requesting bids from processors and/or fishermen for the harvest and purchase of herring. Interested permit holders should contact a Kodiak herring management biologist at the ADF&G office for more details.

**TABLES AND FIGURES** 

Table 1.–KMA districts and management sections, GHLs, closed sections, and district allocation percentages for the herring sac roe fishery, 2019.

| Statistical         | Management                 | GHL  | Purse seine                  | Gillnet     |  |  |  |  |
